

# FLOWER MAKE-UP

## PARTS OF A FLOWER

# Parts Vocabulary

- Stamen – the male part of the flower that contains the pollen, anther and filament
- Anther – portion of the male part of the flower containing the pollen
- Filament – supports the anther
- Petal – “showy” or pretty part of the flower
- Sepal – leaf like structures found at the base of the flower head, “guard petals”

# Vocab continues

- Receptacle or Calyx – protects the base or reproductive organs of the flower
- Stigma – opening which receives the pollen
- Style – enlarged tubular part of the pistil
- Ovary – female part of the flower containing eggs or ovules
- Pistil – female part containing the stigma, style, and ovary
