San Antonio, TX 78205

Dear Quality Department:

My son was eating your Dip and Chip Con Queso sauce after I brought it home from Mayday Market on 16<sup>th</sup> Street. After one bite he said it tasted “funny” and he felt sick. He had diarrhea and fungus growing on his tongue. We took him to visit our doctor and are currently waiting on results.

When I started checking the cheese, I noticed black stuff, maybe mold, on the lid and on one side of the jar. It was a 12 oz jar with “25 Oct 2007” date. Since you are a large company, I figure you have a quality control department that checks products before they leave your plant. I’ve been buying your cheese sauce for years and trusted your products, but I will switch brands now.

I would like for you to cover my son’s doctor’s visit and testing. I still have the jar on the counter and would be happy to send it to you. You can call me at 606-234-5566. I hope nobody else has become ill.

Sincerely,

Millie Miserable
